Fax) 408 - 295 - 9786

111 N Market Street #500

San Jose, CA 95113

### Products:

#### 1. *Anatamage table*

The Anatamage table is an anatomy visualization system for anatomy education composed of a hardware and a software and comes installed with:

- 3D gross body male and female contents (from real patients scans or cadavers) → from head to toe
- 3D High Resolution regional anatomy → regional anatomy contents with high resolution
- An optional digital anatomy library with over 120 pathological examples.

### Applications:

- Full Lab Replacement
- Pre or Post Lab Review

- Lecture
- Pathological and Procedural Training
- Patient Consultation
- Forensic and Virtual

## 2. *Invivo5*

It is a medical imaging software which contains patient scan (MRI, CT, PET) for immediate 2D slice viewing or instant 3D reconstruction.

A module (Medical Design Studio) is available which allows the user to create digital models from patient scans or import digital models into your patient scans. All this can be viewed in the Anatomage table.
